DEMO CASES

www.hdlautomation.com

Demonstrate

The new range of HDL Demo Cases provide you with a truly portable automation solution, letting you take your chosen HDL system wherever it's needed.

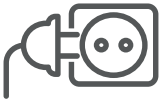

From expos to on site demonstrations, and training courses to module testing, your HDL Demo Case is as versatile, adaptable, and mobile as you need it to be.

Simple

Able to be moved effortlessly, and no bigger than a compact suitcase, an HDL Demo Case can be taken as carryon hand luggage, or economically transported via courier.

Needing only to be plugged into a power socket, HDL Demo Cases require no additional cables, modules, or complex setup procedures.

Strong, Robust, Life Proof

The HDL range of Demo Cases are designed to go wherever you need them to.

With a strong aircraft grade aluminum body, lockable clasps, reinforced corners, automatic locking struts, and able to be operated in any position your HDL automation solutions have never been more secure.

True To Life

Your Demo Case is designed to replicate a real life HDL automation solution. Everything that goes into a brick and mortar installation can be found inside the Demo Case.

Supporting lighting, HVAC, shading, audio, and a customizable selection of HDL keypads and panels, the Demo Case is a HDL empowered room distilled to its purest elements.

Stunning Functionality

Programming your HDL Demo Case has never been easier.

Using the IP interface located on the outward facing gateway module, the system can be used to replicate practically any automation function. Use the movement sensors to trigger the inbuilt LED lights, or program customizable scenes and sequences to show the true power of a HDL automation solution.

A Powerful Platform

From trade shows to product demonstrations, the HDL Demo Case brings abstract concepts into a simple to understand real life format

Explaining accurately how and what an HDL installation is capable of can sometimes be difficult.

That's why HDL has developed an extensive range of Demo Cases.

By simply pressing a button anyone can realize what the system do, and watch the action unfold right before their eyes.

The Range

Encompassing residential and hospitality automation solutions, the HDL Demo Case range highlights the key functions found in each separate system.

With each system presented in an accessible, understandable, and clear manner each HDL Demo Case is an essential tool for all HDL dealers, distributors, and installers.

Hospitality

Residential Demo Case

Representing all of the features normally found in an automated home, HDL's Residential Demo Case enables homeowners to get practical hands on automation experience.

Perfect for tradeshows and product demonstration purposes, the Residential Demo Case makes automation accessible, interactive, and understandable.

Hospitality Demo Cases

Fully equipped to represent the modern automated guest room, the HDL Hospitality Demo Case shows what can turn a good room into a great room. Geared towards easy room management and energy efficiency, the case contains a wide selection of sensors and panels as well as the revolutionary HDL RCU Guest Room Controller.

Tile Series Panel Demo Case

Tile is a series of intelligent control panels that can well meet your requirement with its multi-functional features. Tile Series Panel Demo Case consists of push-button keypads, OLED multifunctional panel, socket panel, USB panel and information panel. It is carefully planned to demonstrate various functions, materials, and colors.

Control Panel Demo Case

HDL provides the market with various options of intelligent control panels, which can be used in homes, commercial buildings, and hotels, as well as other buildings. In this four-layer control panel demo case, we show all kind of HDL panels, including touch display panels, touch panels and push-button panels. Every detail embodies the warm design intention of providing you with the comfortable tactility and experience.
