Precise Control

It's easier than ever before to find, play, and manage your music library using the HDL On app. Able to display everything you connect to HomePlay, the app lets you view your entire music collection, create playlists, play, pause, adjust volume, or skip tracks.

The app even lets you choose what room you want to listen to your music in. From a DubStep house party, to Spotify's best classical music while you cook, all the songs and albums you've collected can be played exactly as you intended.

Hear the Difference

Designed to deliver crystal clear audio to every room in your home, HomePlay brings you a 40 watt amplifier with a dynamic range range of 87 decibels.

Whether you are listening to bass thumping music, or using your HomePlay system in conjunction with your home theatre, HomePlay lets you enjoy rich, high quality audio in every room of your home.

Stream different songs to every room in your home simultaneously.

Stream the same song to every room in your home simultaneously.

With HomePlay there's always something new to listen to . Just stream music directly from your favorite online sources.
